

Carbide Series® 88R MicroATX Mid-Tower Case

Compact, Elegant, and Easy to Build.

The Carbide Series 88R microATX mid tower has all the modern features you need, with SSD compatibility, USB 3.0, and room for full sized graphics cards and power supplies. Room for five 120mm fans offers you excellent cooling potential and the clean, modern design and large window make the case as beautiful as it is functional.

The 88R also fits up to a 240mm front panel radiator if you're upgrading to liquid cooling, and the various tool free drive and cable routing options means your build will be fast and easy.

Elegant, modern design

The 88R is both professional enough for the office, and customizable enough for any home PC build.

Front support for 240mm radiators

The front-mounted 240mm dual radiator mount makes it easier to upgrade your CPU or GPU to liquid cooling.

USB 3.0 front panel port

It's easy to connect modern high-speed peripherals.

Tool-free 3.5" and 5.25" drive installation with easy SSD support

Installing or upgrading your storage no longer has to start with finding your screwdriver. And since the 88R has built-in mounts for high-performance 2.5" SSD drives, no separate adapter is necessary.

Direct airflow to the top GPU

The smart design channels air directly to your graphics card to provide it with the cooling it needs for intense gaming.

Up To five fan mounts, and one included 120mm fan

A 120mm fan gets your cooling off the ground, and extra mounts provide added expandability.

Thumbscrew side panels

Access your system's components with the twist of your fingers.

Flush-mounted side panel window

If you take pride in your work, you can show it off.

Cable routing channels and holes

Buils are further simplified and aesthetics improved with easy cable organization.

Modern internal layout

The modernized interior makes building your dream PC easier while improving overall performance.

Contents and Specifications

Package contents
