

## WORLD'S 1ST TACTICAL MONITOR

### Bright / Dark Pixel Policy

- a. **Warranty is not provided for 0 defective pixels. Warranty is only provided for bright and dark dots.**
- b. **Bright and dark dot description and definition: Dots that light up abnormally under a fully black background or color screen are called bright dots, and the others are called dark dots (dots that light up abnormally under other background colors are also called dark dots).**
- c. **Bright and dark dot determination and warranty content:**
  - i. **Bright and dark dot warranty period: The warranty for bright and dark dots is within 30 days of a new product. A warranty service is not provided for bright and dark dots after 30 days.**
  - ii. **Bright and dark dot determining method: The eye must be away from the screen by 35cm or more, and the ambient illumination must be greater than 200 Lux (for example: common offices).**
  - iii. **Bright dot warranty conditions: Bright dots must not exceed 3 dots (which refers to the 4th dot), and the distance between the bright dots must be 15mm or more.**
  - iv. **Dark dot warranty conditions: Dark dots must not exceed 5 dots (which refers to the 6th dot), and the distance between the dark dots must be 15mm or more.**
